

# Uttar Pradesh data from 3ie's National Rural Livelihoods Project impact evaluation

#### **Background**

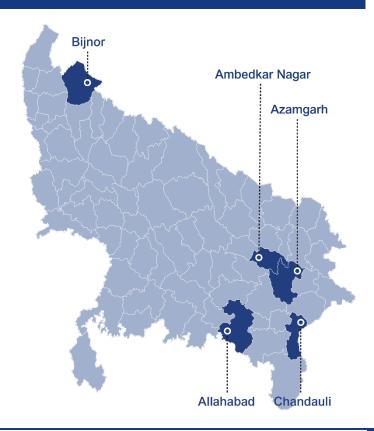

India has articulated its commitment to promote inclusive growth through numerous policies, programmes and plans. In line with this vision, the Ministry of Rural Development launched the National Rural Livelihoods Mission (NRLM) in 2011. The key thrust of NRLM is poverty reduction through the creation and strengthening of institutional platforms of the rural poor. The NRLM provides a combination of financial resources and technical assistance to states so that they can use a comprehensive livelihoods approach that encompasses the following inter-linked tasks: (a) mobilization of all rural poor households into effective Self Help Groups (SHGs), SHG federations and other organizations; (b) enhancing access to financial, technical and marketing services; (c) building capacities and skills for gainful and sustainable livelihoods and finally (d) improving the inclusive delivery of social and economic support services to the poor.

#### Overview of Uttar Pradesh data

Sample districts: 5 Households: 2,398

**SHGs**: 1,989

Village organizations: 29
Cluster-level federations: 5

#### About the study

3ie with the support of Bill & Melinda Gates Foundation partnered with the World Bank and India's Ministry of Rural Development, to conduct an impact evaluation of the National Rural Livelihoods Project (NRLP), which operates under the ambit of the NRLM. The goal was to generate high-quality evidence on the socio-economic and human development impacts of interventions implemented under NRLP. The findings can potentially inform the design and expansion of the programme.

#### Sample

3ie, with on-ground support from Vrutti Livelihood Impact Partners covered 27,000 households in 1,052 villages across nine states in India. These include Rajasthan, Uttar Pradesh, Madhya Pradesh, Maharashtra, Chhattisgarh, Jharkhand, Bihar, Odisha and West Bengal.

# Data for Rajasthan, Uttar Pradesh, Madhya Pradesh, Maharashtra, Chhattisgarh, Jharkhand, and Odisha

The data reported in the factsheets have been collected to suit the evaluation design and answer the research questions articulated in the evaluation report. Data were collected from blocks that started the program in the first phase of program implementation and those that started the program late. Within a block, two types of villages were selected: the early starters and the late starters. Our household data, by design, includes mostly SHG households. To generate state-level population estimates, appropriate sampling weights must be used.
